The WRC Academy Sprinter Standings are an unofficial method of ranking drivers based on individual stage performance. To calculate the Sprinter Score, drivers are awarded points for each stage classification (25-18-15-12-10-8-6-4-2-1) and the total points are divided by the number of stages completed by the driver. This average score gives an indication of the drivers' relative performance against his opponents on special stages, while limiting the impact of time loss due to technical problems on stage and penalties.
